

Seat Belt Use Survey

Seat belt surveys are an observational study of **drivers only**, conducted on the **same day of the week**, during the **same time period**, at the **same location**, by someone in an **unmarked vehicle**. Count only the drivers where the **shoulder belt is in place as “YES”**, and when the **shoulder belt is observed hanging as “NO”**. Do not count when there is a doubt.

The pre-survey must be conducted prior to submittal of the draft grant agreement to OTS. Once the grant period begins, grantees are required to conduct a survey in September of each grant year.

Be sure to submit this form to OTS when completed.

SEAT BELT USE SURVEY

Survey Day/Date: _____ Time: _____ ☐ A.M. ☐ P.M.

Survey Location: _____

Agency Conducting Survey: _____

Indicate a belted or unbelted driver by checking the appropriate block (YES / NO) that corresponds to the vehicle observed. Include drivers of all vehicle types (passenger cars, SUV's, vans, and pick up trucks).

DRIVERS #1-25			DRIVERS #26-50			DRIVERS #51-75			DRIVERS #76-100		
	YES	NO		YES	NO		YES	NO		YES	NO
